

## AustinBuddy Gift of Tone – December 8, 2022 Six Presets for FM3, FM9 and AXE-FX III

See <https://www.youtube.com/@austinbuddy13> for a video demonstration of these presets.

### Strat Jimi 1stAlbumTracks (Use a Strat)

This is a **Preset + Cab Bundle**. Use the editor to IMPORT with a “Wizard” that saves both the preset and the cab. The IR reproduces the sound of the Greenback speakers and mics used on the “Are You Experienced” album by Jimi Hendrix. The **Jimi Early #1 GM12M20s** IR is also included.

This features three songs, with six scenes (Rhythm and Lead for each). The songs are named as “Mary Cries”, “Firey”, and “3rd Planet”. This began as several “bonus” presets on **1400+ Naked Amps TonePack**. I made presets for the entire first Hendrix album and included them in the Bonus section of “Naked Amps”.

### LotsaLiking LP (Use a Les Paul)

This is my take on the classic “Whole Lotta Love” by Led Zeppelin. The seven scenes emulate the album guitar tone through studio speakers (this is NOT a live stage tone). This is from my **Brit Rock Royalty #1** collection, which covers every electric guitar sound and part on the first four Zeppelin albums.

For the rhythm scenes, use the middle position (both pickups) with the neck volume turned down to about 7. For the Lead scene, use the bridge “wide open” for the screaming lead. Use a pedal on “EXTERNAL 1” to activate a Theremin emulation — you control the pitch with your foot!

### **EVH Live Brit Brown** (I use my Wolfgang EVH with this)

This is my personal (ever-evolving) Van Halen humbucker preset with seven scenes for live use. It includes the phaser and flanger plus chorus, pitch shift, delay, and reverb. This preset is offered here for the first time!

### **Strat Vaughan-A-Bees** (Use a Strat)

The first scene is the Jimmie Vaughan sound. Use the middle pickup and turn the guitar volume down to 5-6 to nail that tone. For “SRV” sounds, scenes 2, 3 and 4 are variations on a very loud Steel String Singer (Dumble) amp. Scenes 5, 6, and 7 use the 1x15 Vibroverb for the “Live at the El Macambo” sound.

### **(LG) Dual Recto Extras2** (Use Humbuckers)

This rocking preset is just a small sample of the 1,000+ diverse and versatile tones in the **1000+ LiveGold TonePack**. It features eight scenes like “The 90’s are Back” “Exploding Creed” and “RectoRock”.

### **3RagingMachine 4BASS** (Fender Jazz Bass)

This is taken from the Artist section of my **200+ Bass TonePack**. This is the more recent era “Rage Against” style bass sound, with two scenes: clean and dirty.

---

*Note: the “-CX2” after each present name simply means the presets was made/saved under the **latest Cygnus X2 firmware**. For the Axe-Fx III, use firmware 21 or newer. For the FM9, use firmware 4.0 or newer. For the FM3, use firmware 6.0 public beta or newer. These presets may appear as “Empty” if loaded under an older firmware than those listed.*

# ENJOY THE TONES!
