## Fractal Audio „FSM Gift Of Tone“

This preset is based on my „FSM Favorite preset“.  
It's a kind of All-In-One-preset.

**Scene 1:** Ambient Clean Sound with the „Car Roamer“.  
Activate the Drive Block for some nice Lead tones.

**Scene 2:** A perfect Scene for clean Soul & Funk rhythm.  
If you add the Drive Block (Channel C, BB Drive) you'll get a more jazzy kind of tone.

**Scene 3:** Rock Rhythm using the Friedman HBE V1 - you can go from classic Rock to Djent. You can use it for solo as well.  
Super versatile.

**Scene 4:** Rock Lead with the Friedman HBE V1.

**Scene 5:** Lead Cirrocumulus  
Same as Rock Lead with added PlexDly and the incredible Cirrocumulus Reverb.

**Scene 6:** Classic Rock  
Fantastic sound for all kinds of Classic Rock rhythm.  
Add the Wah for some Hendrix vibe.

**Scene 7:** Clean Dotted 8ths  
Classic Dotted 8ths sound with added PlexDly.

**Scene 8:** Clean Ambient Plex  
Clean Sound with PlexDly and the Cirrocumulus Reverb.

**Tips:** 1. In Scene 1, 7 and 8 turn your guitar volume to 5 or less for a nice clean sound.  
Turn it up for a fantastic break-up sound.  
2. If you prefer a warmer sound, add the PEQ block (channels A,B,C,D).  
3. The Wah uses FC1 PEDAL 1 For Axe-Fx III or FM9 and PEDAL 1 for the FM3.  
4. Use the LOOPER and have fun - it starts with Record Threshold.

### **Firmware requirements:**

Axe-Fx III requires firmware 21 or newer.  
FM3 requires firmware 6.0 beta 4 or newer.  
FM9 requires firmware 4.0 beta 2 or newer.

Hope you enjoy my „Gift Of Tone“.

Cheers Frank
